QUESTION 1 You administer a Windows 10 Enterprise computer that runs Hyper-V. The computer hosts a virtual machine with multiple snapshots. The virtual machine uses one virtual CPU and 512 MB of RAM. You discover that the virtual machine pauses automatically and displays the state as paused-critical. You need to identify the component that is causing the error. Which component should you identify? A. no virtual switch defined B. insufficient memory C. insufficient hard disk space D. insufficient number of virtual processors Answer: C QUESTION 2 You have a Microsoft Intune subscription. You have three security groups named Security1, Security2 and Security3. Security1 is the parent group of Security2. Security2 has 100 users. You need to change the parent group of Security2 to be Security3. What should you do first? A. Edit the properties of Security1 B. Edit the properties of Security2 C. Delete security2 D. Remove all users from Security2 Answer: C QUESTION 3 A company has 10 portable client computers that run Windows 10 Enterprise. The portable client computers have the network connections described in the following table

Network name	Connection type	Network profile
CorpWired	Wired	Private
CorpWifi	Wireless	Public
HotSpot	Public hotspot	Public

None of the computers can discover other computers or devices, regardless of which connection they use. You need to configure the connections so that the computers can discover other computers or devices only while connected to the CorpWired or CorpWifi connections. What should you do on the client computers? A. For the CorpWifi connection, select Yes, turn on sharing and connect to devices B. Turn on network discovery for the Public profile C. Change the CorpWired connection to public. Turn on network discovery for the Public profile For the HotSpot connection, select No, don't turn on sharing or connect to devices D. For the CorpWired connection, select Yes, turn on sharing and connect to devices E. Turn on network discovery for the Private profile Answer: C QUESTION 4 Hotspot Question Your company upgrades a research and development department workstation to a Windows 10 Enterprise computer. Two of the workstation's folders need to be encrypted. The folders are named C:\ProtectedFiles and C:\Backups. You attempt to encrypt the folders. The output is shown in the following exhibit.

```
Administrator: Command Prompt
C:\>cipher /e /s:C:\ProtectedFiles
Setting the directory ProtectedFiles to encrypt new files
Encrypting files in C:\ProtectedFiles\
Project1.zip [OK]
Project2.zip [OK]
Project3.zip [OK]
Project4.zip [OK]
5 file(s) [or directorie(s)] within 2 directorie(s)
Converting files from plaintext to ciphertext may require
plaintext on the disk volume(s). It is recommended
CIPHER /V:directory to clean up the disk after all
C:\>cipher /e /s:C:\Backups
Setting the directory Backups to encrypt new files
Encrypting files in C:\Backups\
Backup.zip [ERR]
Backup.zip: The specified file is read only.
OldBackup.zip [OK]
2 file(s) [or directorie(s)] within 2 directorie(s)
Converting files from plaintext to ciphertext may require
plaintext on the disk volume(s). It is recommended
CIPHER /V:directory to clean up the disk after all
C:\>
```

Use the drop-down menus to select the answer choice that completes each statement. NOTE: Each correct selection is worth one point.

Answer Area

The attempt to encrypt the ProtectedFiles folder and files [answer choice]

succeeded for all files and folders.

succeeded for the files but not for the folder.

will not finish until you run the command to clean up the disk.

The attempt to encrypt the Backups folder and files [answer choice]

failed to encrypt the files and folders.

encrypted the folder but not the files.

failed to encrypt one of the files but encrypted the folder and the other file.

Answer:

Answer Area

The attempt to encrypt the ProtectedFiles folder and files [answer choice]

succeeded for all files and folders.

succeeded for the files but not for the folder.

will not finish until you run the command to clean up the disk.

The attempt to encrypt the Backups folder and files [answer choice]

failed to encrypt the files and folders.

encrypted the folder but not the files.

failed to encrypt one of the files but encrypted the folder and the other file.

QUESTION 5You have a computer named Computer1 that runs Windows 10 Enterprise. You add a 1 TB hard drive and create a new volume that has the drive letter D. You need to limit the amount of space that each user can consume on D: to 200 GB. Members of the Administrators group should have no limit. Which three actions should you perform? Each correct answer presents part of the solution. A. Run fsutil quota violations D:..B. Enable the Deny disk space to users exceeding quota limit setting.C. Enable the Enable Quota Management setting.D. Set a default quota limit.E. Run convert D: /FS:NTFS.F. Add a quota entry.

Answer: BCD QUESTION 6Drag and Drop QuestionYou have a computer that runs Windows 10 Enterprise that contains the following folders:

- Folder1
- Folder2
- Folder3
- Folder4
- Folder5

You have a local user named User1. User1 has read and execute permission to Folder1. You need to ensure that User1 can perform the following tasks.- Create new files in Folder2.- Edit all files in Folder3.- Change the permissions of files in Folder5.The solution must use the principle of least privilege. Which permissions should you assign to User1 on each folder? To answer, drag the appropriate permissions to the correct folders. Each permission may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Permissions

Full Control

List Folder Contents

Modify

Read

Read & Execute

Write

Answer Area

Folder2: Permission

Folder3: Permission

Folder5: Permission

Answer:

Permissions

List Folder Contents

Read

Read & Execute

Answer Area

Folder2: Write

Folder3: Modify

Folder5: Full Control

QUESTION 7You have a Windows 10 Enterprise computer. The computer has a shared folder named C:Marketing. The shared folder is on an NTFS volume. The current NTFS and share permissions are configured as follows.

Group name	NTFS permission
Everyone	Read and Execute
Marketing	Modify

UserA is a member of both the Everyone group and the Marketing group. UserA must access C:Marketing from across the network. You need to identify the effective permissions of UserA to the C:Marketing folder. What permission should you identify? A. Full ControlB. Read and ExecuteC. ReadD. Modify Answer: D QUESTION 8A company has Windows 10 Enterprise client computers. The client computers are connected to a corporate private network. Users are currently unable to connect from their home computers to their work computers by using Remote Desktop. You need to ensure that users can remotely connect to their office computers by using Remote Desktop. Users must not be able to access any other corporate network resource by using the local Windows installation from their home computers. Which setting should you configure on the home computers? A. Virtual Private Network connectionB. Remote Desktop local resourcesC. DirectAccess connectionD. Remote Desktop Gateway IP address Answer: D QUESTION 9Drag and Drop QuestionYou have a desktop computer and a tablet that both run Windows 10 Enterprise. The desktop computer is located at your workplace and is a member of an Active Directory domain. The network contains an Application Virtualization (App-V) infrastructure. Several App-V applications are deployed to all desktop computers. The tablet is located at your home and is a member of a workgroup. Both locations have Internet connectivity. You need to be able to access all applications that run on the desktop computer from you tablet. Which actions should you perform on each computer? To answer, drag the appropriate action to the correct computer. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

Actions	Answer Area
Enable Remote Desktop.	desktop computer Action
Enable Remote Assistance.	tablet Action
Install Client Hyper-V.	
Install the Application Virtualization (App-V) Client.	
Deploy Application Virtualization (App-V) packages.	
Run the Remote Desktop Client.

QUESTION 10You manage a network that includes Windows 10 Enterprise computers. All of the computers on the network are members of an Active Directory domain. The company recently proposed a new security policy that prevents users from synchronizing applications settings, browsing history, favorites, and passwords from the computers with their Microsoft accounts. You need to enforce these security policy requirements on the computers. What should you do? A. On the Group Policy Object, configure the Accounts: Block Microsoft accounts Group Policy setting to Users can't add Microsoft accounts.B. On the Group Policy Object, configure the Accounts: Block Microsoft accounts Group Policy setting to Users can't add or log on with Microsoft accounts.C. From each computer, navigate to Change Sync Settings and set the Sync Your Settings options for Apps, Browser, and Passwords to Off.D. From each computer, navigate to Change Sync Settings and set the Sync Your Settings option to Off. Answer: B QUESTION 11Drag and Drop QuestionYou manage 50 computers that run Windows 10 Enterprise. You have a Microsoft Azure RemoteApp deployment. The deployment consists of a hybrid collection named Collection1. All computers have the Hyper-V feature installed and have a virtual machine that runs Windows 7. You plan to install applications named App1 and App2 and make them available to all users. App1 is a 32-bit application. App2 is a 64-bit application. You need to identify the installation method for each application. The solution needs to minimize the number of installations. Which deployment method should you identify for each application? To answer, drag the appropriate deployment methods to the correct applications. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each

correct selection is worth one point

Deployment Methods	Answer Area
Azure RemoteApp	App1: Deployment method
Client Hyper-V	App2: Deployment method
Local installation

QUESTION 14 Drag and Drop Question You plan to deploy a Microsoft Azure RemoteApp collection by using a custom template image. The image will contain Microsoft Word and Excel Office 365 ProPlus programs. You need to install the Word and Excel programs. The solution must minimize the amount of Internet traffic used during installation. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Download the Office Deployment Tool.	
Modify the Click-to-Run for Office 365 Configuration.xml file.	
Run setup.exe /configure.	
Download Office 365 Deployment Readiness Tool.	
Run setup.exe /packager.	
Run setup.exe /download.
